SECTION-BY-SECTION: WHAT IS WHERE & HOW TO CHANGE IT

1. BRAND COLOURS — css/base/tokens.css (lines 8-20)

To change GOLD colour:

--gold:  #C9A84C; ← Main gold

--gold-light:  #E8C97A; ← Lighter gold (used in text on dark bg)

--gold-dark:  #9A7A2E; ← Darker gold

--gold-muted: rgba(201,168,76,0.12); ← Transparent gold for backgrounds

To change NAVY/DARK colour:

--navy:  #0A1628; ← Darkest navy

--navy-mid:  #12223E; ← Mid navy

--navy-light:  #1C3358; ← Lighter navy

To change BACKGROUND colour:

--cream: `background-color: #FAF7F0;` ← Main page background (light sections)

--cream-dark: `background-color: #F0EBE0;` ← Slightly darker cream sections

To change FONTS:

--font-serif: 'Cormorant Garamond', Georgia, serif; ← Headings

--font-sans: 'Outfit', system-ui, sans-serif; ← Body text

2. TOPBAR (top strip with phone + email)

FILE: js/core/app.js → search "topbar" (around line 78)

To change phone numbers:

href="tel:+919892960023" and the text "+91 98929 60023"

href="tel:+917021231145" and the text "+91 70212 31145"

To change email: href="mailto:info@alkhalistravels.com" and the visible text
"info@alkhalistravels.com"

To change business hours:

Find "Mon-Sat: 10AM-7PM" and edit the text

Topbar background colour:

FILE: css/components/nav.css → search ".topbar {"

Change: background: var(--navy);

3. NAVBAR (main navigation menu)

FILE: js/core/app.js → search "buildNav()" (around line 95)

To change LOGO:

Replace file: assets/logo-wide-rgba.png

(Keep same filename OR update the src in app.js → search "nav-logo__img")

To change menu items / links:

Find the "pages" array in buildNav() — edit href or label

To add a new menu item:

Add: { href: r + 'pages/newpage.html', label: 'New Page' }

To change "Book Now" button text:

Find: class="nav-cta" and edit the text "Book Now"

Navbar background (when scrolled):

FILE: css/components/nav.css → search "#navbar.scrolled {"

Change: background: rgba(10,22,40,0.97);

Active link underline colour:

FILE: css/components/nav.css → search ".nav-links a::after {"

Change: background: var(--gold);

4. HOME PAGE — index.html

— 4a. HERO SECTION (full screen intro)

FILE: index.html → search "HERO SECTION"

To change "Mumbai's Most Trusted Travel Agency" pill text:

Find: class="hero__tag"

Edit the text between the span tags

To change main headline "Your Journey to Dream Destinations Starts Here":

Find: class="hero__title"

Edit the text – "accent" class = gold coloured words

To change description paragraph:

Find: class="hero__desc"

Edit the paragraph text

To change "Explore Packages" button:

Find: class="btn btn--gold" → edit text and href

To change "Get Free Quote" button:

Find: class="btn btn--outline-white" → edit text and href

To change mini stats (15,000+ Happy Clients / 50+ Destinations / 20yrs):

FILE: data/data.js → search "stats:" (line 28)

Edit number, suffix, label for each stat

HERO BACKGROUND IMAGE:

FILE: assets/images/hero-home.jpg

Replace this file with your own photo (keep same filename)

OR: css/pages/images.css → search ".hero {" → change url()

— 4b. BOOKING WIDGET (Flight/Hotel/Packages/Umrah tabs)

FILE: js/modules/booking.js

To change popular flight routes chips:

Search `"_routeChips()"` → edit the routes array

Format: `['Display Text', 'From City (CODE)', 'To City (CODE)']`

To change hotel popular city chips:

Search `"setHotelDest"` inside `bw-hotel` panel → edit chip names

To change package destinations in dropdown:

Search `"pkg-dest"` → edit the `<option>` tags and values

To change Umrah package tiers and prices:

Search `"UMRAH_PRICES:"` → edit economy/standard/premium/luxury values

To change base flight price estimates:

Search `"FLIGHT_PRICES:"` → edit price for each route

WhatsApp number (in result modal):

Search `"wa.me/919892960023"` → replace with your number

— 4c. STATISTICS BAR (gold bar with numbers)

FILE: `data/data.js` → search `"stats:"` (line 28)

Edit: number, suffix (`"+"`, `"%"`, `"yrs"`), label

— 4d. SERVICES SECTION ("Complete Travel Solutions")

FILE: `data/data.js` → search `"services:"` (line 37)

Each service: { icon, title, desc, href }

Edit icon (emoji), title, description, or link

— 4e. DESTINATIONS SECTION ("Where Will You Go Next?")

FILE: `data/data.js` → search `"destinations:"` (line 49)

Each card: { emoji, name, sub, price, bg, href }

Edit destination name, flight time, price, background colour gradient

— 4f. WHY CHOOSE US SECTION

FILE: `index.html` → search `"WHY CHOOSE US"`

Edit the 4 features: icon, heading, description text directly in HTML

— 4g. TESTIMONIALS / REVIEWS SECTION

FILE: `data/data.js` → search `"testimonials:"` (line 112)

Each review: { initials, name, trip, stars, text }

Add/edit/remove customer reviews here

— 4h. CTA SECTION ("Ready for Your Next Adventure?")

FILE: `index.html` → search `"cta-section"`

Edit heading, paragraph, button texts and links directly

— 4i. AIRLINE PARTNERS (bottom strip)

FILE: data/data.js → search "partners:" (line ~183)

Edit the array of airline/partner names

5. FLIGHT PAGE — pages/flight.html

— Hero text (title, subtitle, breadcrumb):

FILE: pages/flight.html → search "page-hero__title"

Edit h1, subtitle paragraph directly in HTML

— Flight search form fields (From, To, Date, Class, Passengers):

FILE: pages/flight.html → search "search-wrap"

Edit labels, placeholder text, select options

— Popular route chips (Mumbai → Dubai etc.):

FILE: pages/flight.html → search "route-chip"

Edit data-from, data-to, and display text of each chip

— Filter sidebar (Airlines, Stops, Price):

FILE: pages/flight.html → search "filter-sidebar"

Add/remove airline checkboxes or change price range limits

— Sample flight results:

FILE: js/modules/flight.js → search "FLIGHTS =" OR "allFlights"

FILE: data/data.js → search "flights:" (line 57)

Edit airline name, flight number, departure/arrival times, price

— "Why Book With Us" cards:

FILE: pages/flight.html → search "Why Book With Us"

Edit icon, title, description directly in HTML

6. VISA PAGE — pages/visa.html

— Visa countries grid (flags with country names):

FILE: data/data.js → search "visaCountries:" (line ~163)

Each entry: { flag, name, type }

Add/remove countries, change visa type labels

— 4-step process (Fill → Submit → Embassy → Delivered):

FILE: pages/visa.html → search "process-timeline"

Edit step numbers, titles, descriptions directly

— Visa types (Tourist, Business, Student etc.):

FILE: pages/visa.html → search "types-heading"

Edit icon, name, description of each visa type card

— Visa enquiry form fields:

FILE: pages/visa.html → search "Visa Enquiry Form"

Add/remove fields, change dropdown options directly

— Success stats (98%, 5000+):

FILE: pages/visa.html → search "Our Success Record"

Edit numbers directly in HTML

7. HOTEL PAGE — pages/hotel.html

— Hotel cards (name, location, price, amenities, rating):

FILE: data/data.js → search "hotels:" (line 67)

Each hotel: { emoji, name, loc, stars, rating, reviews, price, amenities, bg }

Change price: edit the number (e.g. price:18500 = ₹18,500/night)

Change background colour: edit "bg" gradient colours

— Popular city chips (Dubai, Makkah etc.):

FILE: pages/hotel.html → search "class="chip""

Edit onclick destination name and chip label

— "Why Book Hotels With Us" cards:

FILE: pages/hotel.html → search "why-hotel-heading"

Edit 4 cards directly in HTML

8. PACKAGES PAGE — pages/packages.html

— All tour packages (name, price, nights, includes, category):

FILE: data/data.js → search "packages:" (line 77)

Each package:

name → Package title

dest → Destination shown under name

nights → Duration number

price → Price in INR (e.g. 42999 = ₹42,999)

priceNote → "per person" or "per couple"

cat → Filter category: 'international', 'domestic', 'religious', 'honeymoon', 'group' (controls which filter tab shows it)

includes → Array of 4 inclusions shown as chips

tag → Badge text (e.g. "Best Seller")

tagType → Badge colour: 'gold','blue','green'

— Filter tab categories:

FILE: pages/packages.html → search "filter-tab-row"

Edit button labels or data-cat values

— Urgency strip ("Limited Time Offer"):

FILE: pages/packages.html → search "Limited Time Offer"

Edit the promotional text or remove the entire <div>

— "Can't Find Your Package?" CTA:

FILE: pages/packages.html → search "Bespoke Travel"

Edit heading, description, button texts and links

9. FOREX PAGE — pages/forex.html

— Live currency rates (buy/sell prices):

FILE: data/data.js → search "currencies:" (line 90)

Each currency: { code, name, flag, buy, sell, change, pct }

Update buy/sell prices daily as needed

— Currency converter options:

FILE: js/modules/forex.js → search "initConverter()"

Currencies are pulled from data.js automatically

— Chart period buttons (7D, 1M, 3M, 6M):

FILE: pages/forex.html → search "time-btn-group"

Edit button labels or data-period values

— "What We Offer" list (Exchange, Travel Cards etc.):

FILE: pages/forex.html → search "What We Offer"

Edit the list items directly in HTML

— Disclaimer text:

FILE: pages/forex.html → search "Disclaimer"

Edit the disclaimer paragraph

10. HAJJ & UMRAH PAGE — pages/hajj.html

— Umrah package tiers (Economy/Standard/Premium/Luxury):

FILE: data/data.js → search "umrahPackages:" (line 104)

Each tier:

tier → Name displayed

icon → Emoji

nights → Duration

price → Price per person in INR

headerBg → CSS gradient for the coloured header

features → Array of what's included (✓ items)

missing → Array of what's NOT included (X items)

popular → true/false — shows "Most Popular" badge

— Departure schedule cards (June, July, Ramadan):

FILE: pages/hajj.html → search "Upcoming Departures"

Edit month name, date range, price, seat availability text

— Hajj eligibility requirements:

FILE: pages/hajj.html → search "Hajj Eligibility"

Edit the bullet points directly in HTML

— 4 feature stats (5,000+ Pilgrims / 20+ Years / 100% / 24/7):

FILE: pages/hajj.html → search "data-target"

Edit the number and label text

— FAQ questions and answers:

FILE: data/data.js → search "faqs:" → "umrah:" section

Edit question (q) and answer (a) text

11. CONTACT PAGE — pages/contact.html

— Phone numbers, email, addresses, hours:

FILE: data/data.js → search "site:" (line 13)

Changing here updates data layer — but contact.html also has them hardcoded. Update BOTH for full coverage.

— Contact page HTML addresses:

FILE: pages/contact.html → search "Head Office" / "Branch Office"

Edit address text, phone links, email links directly

— Google Map embed: FILE: pages/contact.html → search "<iframe" Replace the
src="<https://www.google.com/maps/embed?...>" URL Get new embed URL from: Google Maps →
Share → Embed a map

— Enquiry form dropdown options:

FILE: pages/contact.html → search "Service Required"

Add/remove <option> tags for services

— Office tab switching (Head / Branch button):

FILE: pages/contact.html → search "switchOffice"

Edit address content in #office-head and #office-branch divs

12. ABOUT PAGE — pages/about.html

— Company story paragraphs:

FILE: pages/about.html → search "Our Story"

Edit the <p> tags directly

— Timeline (2005, 2008, 2011 etc.):

FILE: pages/about.html → search "timeline-item"

Edit year, title, description for each milestone

— Team members (name, role, description):

FILE: data/data.js → search "team:" (line ~175)

Each: { initial, name, role, desc }

Change initial (shows as avatar letter), name, role, description

— Team member PHOTOS:

FILE: assets/images/team-founder.jpg (and team-flight, team-visa, team-hajj)

Replace these files with real team photos

Recommended size: 400×400px square

— Core values (Integrity, Excellence etc.):

FILE: pages/about.html → search "values-heading"

Edit 4 value cards: icon, title, description

13. BLOG PAGE — pages/blog.html

— Blog post cards (title, excerpt, author, date, tags):

FILE: data/data.js → search "blogPosts:" (line 122)

Each post: { emoji, cat, catType, date, read, author, title, excerpt, tags }

Edit title, excerpt, date, author name, reading time

— Blog thumbnail images:

FILE: assets/images/blog-umrah.jpg etc.

Replace with real article photos (recommended: 800×500px)

— Sidebar categories and post counts:

FILE: pages/blog.html → search "Blog categories"

Edit category names and counts directly in HTML

— Recent posts sidebar:

FILE: pages/blog.html → search "Recent Posts"

Edit post titles and dates directly in HTML

— Newsletter form (sidebar):

FILE: pages/blog.html → search "Subscribe Now"

Connect this to your email service (Mailchimp etc.)

14. FOOTER (appears on all pages)

FILE: js/core/app.js → search "buildFooter()"

— Footer LOGO:

Replace: assets/logo-wide-rgba.png

(Same file used in navbar and footer)

— "Your Trusted Travel Partner Since 2005" tagline:

Find: class="footer-brand__tag" → edit text

— Description paragraph:

Find: class="footer-desc" → edit paragraph

— Address lines (both offices):

Find the two footer-contact-row divs → edit address text and phone links

— Social media icons and links: Find: class="footer-social" in buildFooter() Edit each

href="<https://www.facebook.com/...>" etc. Current 8 icons: Facebook · Instagram · X/Twitter · YouTube WhatsApp · LinkedIn · Telegram · Email

— Quick Links column:

Find the "Quick Links" section → edit link texts and hrefs

— Our Services column:

Find the "Our Services" section → edit service names and hrefs

— Newsletter email input:

Currently shows success toast. To connect to real email service:

FILE: js/core/app.js → search "newsletter-form"

Replace the form submit handler with your API call

— Certification badges (IATA, TAAI, Ministry of Hajj, RBI):

Find: class="footer-certs" → edit cert-pill text labels

— Copyright year:

Find: `{new Date().getFullYear()}` → auto-updates every year

— Footer background colour:

FILE: `css/components/nav.css` → search `"footer {"`

Change: `background: #060D1B;`

15. FLOATING BUTTONS (WhatsApp + Call — bottom right)

FILE: `js/core/app.js` → search "Floating Action Buttons"

— WhatsApp number: Find: `href="https://wa.me/919892960023"` → change to your number

Format: `wa.me/91XXXXXXXXXX` (no spaces, no dashes, with country code)

— WhatsApp pre-filled message:

Find: `?text=Hello%21%20I%20am%20interested%20...`

Edit the text (URL-encoded — use `%20` for spaces, `%21` for !)

— Call button phone number:

Find: `href="tel:+919892960023"` → change to your number

— Button colours:

FILE: `css/components/nav.css` → search `".float-btn--wa {"` and `".float-btn--call {"`

WhatsApp: `background: #25D366;`

Call: `background: linear-gradient(135deg, #FF8C00, #FFA500);`

— Button size:

FILE: `css/components/nav.css` → search `".float-btn {"`

Change: `width: 58px; height: 58px;`

— Button position (how far from bottom/right edge):

FILE: `css/components/nav.css` → search `".float-btns-wrap {"`

Change: `right: 22px; bottom: 90px;`

16. STICKY CTA BAR (bottom strip "Ready to travel?")

FILE: `js/core/app.js` → search "sticky-cta"

— Text "Ready to travel? Talk to our experts!":

Find: `class="sticky-cta__text"` → edit the text

— Button labels ("Call Now", "Get Free Quote", "WhatsApp"):

Find the 3 `<a>` tags inside `sticky-cta__actions` → edit text and hrefs

— When it appears (after scrolling how far):

FILE: js/core/app.js → search "initStickyCTA()"

Change: window.scrollY > 400 (400px from top)

— Bar background colour:

FILE: css/components/nav.css → search ".sticky-cta {"

Change: background: var(--navy);

17. HERO IMAGES (all pages)

FILE: css/pages/images.css (all hero backgrounds defined here)

FILE: assets/images/hero-*.jpg (actual image files)

To replace a hero image with your own photo:

1. Prepare your photo — recommended 1920×800px JPG
2. Name it exactly as shown (e.g. hero-home.jpg)
3. Replace the file in assets/images/
4. The CSS automatically uses it — no code change needed

To change the dark overlay intensity on hero images:

FILE: css/pages/images.css → search ".page-hero::after"

Change rgba(6,14,28,0.65) → higher number = darker overlay

Range: 0.0 (none) to 1.0 (completely black)

Home page hero specifically:

FILE: css/pages/images.css → search ".hero::after"

Same principle — edit the rgba opacity values

18. SEO META TAGS (title, description, keywords)

Each page has its own SEO tags in the <head> section:

HOME: index.html → lines 1-165

FLIGHT: pages/flight.html → lines 1-100

VISA: pages/visa.html → lines 1-100

HOTEL: pages/hotel.html → lines 1-100

PACKAGES: pages/packages.html → lines 1-100

FOREX: pages/forex.html → lines 1-100

HAJJ: pages/hajj.html → lines 1-100

CONTACT: pages/contact.html → lines 1-100

ABOUT: <pages/about.html> → lines 1-100

BLOG: <pages/blog.html> → lines 1-100

In each file, look for and edit:

`<title> ... </title>`

`<meta name="description" content="...">`

`<meta name="keywords" content="...">`

`<meta property="og:title" content="...">`

`<meta property="og:description" content="...">`

`<link rel="canonical" href="...">`

Schema.org (rich results for Google):

Look for: `<script type="application/ld+json">`

Edit business name, address, phone, hours, prices inside the JSON

19. ANALYTICS — Google Analytics + Facebook Pixel

FILE: [js/modules/analytics.js](#) → lines 1-20

To connect Google Analytics:

Change: `GA4_ID: 'G-XXXXXXXXXX'`

Replace with your real ID from [analytics.google.com](#)

Format: `'G-ABCDE12345'`

To connect Facebook Pixel:

Change: `FB_PIXEL_ID: '000000000000000'`

Replace with your real Pixel ID from [business.facebook.com](#)

Format: `'1234567890123'`

To enable debug logging (see all events in browser console):

Change: `debug: false` → `debug: true`

20. SITEMAP — Update when adding new content

FILE: [sitemap.xml](#)

When you publish a new blog post:

Add a new `<url>` block at the bottom

Update `<lastmod>` date on the changed page

Re-submit sitemap in Google Search Console

When you change package prices:
Update <lastmod> for packages.html to today's date
Google will re-crawl and re-index the updated prices

QUICK REFERENCE: MOST COMMON EDITS

	WHAT TO CHANGE	WHERE TO CHANGE IT
	Phone number (everywhere)	data/data.js → phone1, phone2 js/core/app.js → topbar + footer js/modules/booking.js → wa.me link
	Email address (everywhere)	data/data.js → email js/core/app.js → topbar + footer
	Business address	data/data.js → head_office, branch_office pages/contact.html → HTML directly
	Package prices	data/data.js → packages → price
	Umrah prices	data/data.js → umrahPackages → price
	Forex exchange rates	data/data.js → currencies → buy/sell
	Stats (15,000+ clients etc.)	data/data.js → stats → number
	Customer reviews/testimonials	data/data.js → testimonials
	Team member names	data/data.js → team
	Team member photos	assets/images/team-.jpg
	Logo	assets/logo-wide-rgba.png (navbar) assets/logo-square-rgba.png (icons)
	Hero background images	assets/images/hero-.jpg
	Social media links	js/core/app.js → buildFooter() search "footer-social"
	Gold colour	css/base/tokens.css → --gold

	Navy/dark colour	css/base/tokens.css → --navy
	Font family	css/base/tokens.css → --font-serif and --font-sans
	WhatsApp floating button number	js/core/app.js → search "wa.me"
	Google Analytics ID	js/modules/analytics.js → GA4_ID
	Google Map on contact page	pages/contact.html → <iframe src=
	Page title (browser tab)	Each page → <title> in <head>
	Meta description (Google snippet)	Each page → <meta
name="description"
